To Whom it May Concern

The best way to summarize Drew is that he is a very balanced individual. He has approached his experience as a student at Drew Charter with great curiosity and courage to delve into difficult challenges. I have known Drew for more than 7 years as his soccer coach and as the school social worker. I have seen him develop into a very strong student and even stronger soccer player. Drew is a very calm and focused individual. When he focuses his attention on a goal he is definitely going to achieve it. Some of Drew's accomplishments include being an Honor Roll student since 2018, achieving the Engineering Excellence Award in 2021, and publishing a book titled "Cooking Made Easy: A Chef's Diary" (May 31, 2020).

I have had the honor of coaching Drew since he was a sixth grader. Drew has always had a calm but determined demeanor. He has grown significantly as a player over the years. He is currently a leader on our undefeated varsity soccer season. Drew uses his leadership skills to encourage his younger teammates and support them when they need help. Drew is an important part in the emergence of our soccer team as a consistent force in the district. Drew continues to balance performing at high level on the soccer field and maintaining academic excellence.

I highly recommend Drew for the Eta Omega scholarship opportunity. Drew has the aptitude and focus to do whatever he wants to do in his life. Drew will only grow in maturity and ability as a young man. He will put this award to good use as he pursues his goals. I look forward to watching from afar as Drew excels in the next stage of life.
