To the Omega Psi Phi Eta Omega Chapter Scholarship Committee:

It is with great honor that I recommend Chancellor Tanner for the Omega Psi Phi Eta Omega Chapter Scholarship. In addition to teaching him AP Calculus AB, for two years I have observed this stellar young man interact with classmates, teammates, faculty, staff, coaches, and administration at Mays High School. During these unprecedented times, Chancellor has successfully managed himself through virtual learning and continues to excel as he navigates school-wide academic, extracurricular, and personal responsibilities.

Through his academic awards and honors, and extracurricular involvement, Chancellor clearly distinguishes himself from peers. As an AP Calculus AB student, Chancellor is always striving to improve his academic standing in class by regularly attending tutorial, asking relevant questions, and always challenging himself to improve. Teaching him has been a real joy! As a member of the National Honor Society, National Beta club, Science National Honor Society (all 3 years), Principal's List Awardee, 1st Place Award recipient for the APS Technology & Innovative Competition, and a member of the Academic Decathlon team that won 1st Place in the Atlanta Public School District, these multiple academic awards and honors speak to his ability to master content and compete and excel on a national level.

Chancellor's display of mature leadership qualities, recognized by both peers and adults, are evident by him being voted Mr. Senior & Mr. Sophomore. He has been selected Team Captain for Track (2 years, anticipating 3 years) and promoted to 2nd Lieutenant in JROTC. This clearly signifies the level of respect and influence Chancellor has among his peers beyond the classroom and speaks to his competitive nature which pushes him to thrive in academically challenging situations. In my 20+ years of education, students like Chancellor Tanner are hard to find. Chancellor is a team player who always offers insightful perspectives and takes initiative during exploration and collaboration. As a top student in my AP Calculus AB class, my expectation is for Chancellor to continue improving and achieve a score of 4 or 5 on the AP exam. Whether on the football field as a linebacker or as a member and photographer of the Homeless Pet Club, Chancellor's service-oriented personality will find ways to rise to the top as his individuality and leadership skills are showcased.

With high motivation and drive to be a leader among his peers, Chancellor is bound for success in his post-secondary studies. As President of the Technology Student Association (2 years), Chancellor has prepared himself for this moment and for the opportunity to study among the world's best technology inventors and developers. His work as a student-researcher at Georgia Tech with Project ENGAGES has left a last impression on his mentor and engineers involved in helping to develop his research presentation. Chancellor remained focus on his research and excelling in Project ENGAGES even while his mother was battling and won her fight against Breast Cancer. Chancellor's commitment to his education is unwavering, and he has remained steady even in the face of this unthinkable challenge.

Proud members of the Eta Omega Chapter of the Omega Psi Phi would be honored to have Chancellor Tanner represent their fraternity as a scholarship recipient. Students like Chancellor are

uncommon. His distinct and unique qualities should be celebrated and nurtured. As a recipient of the Eta Omega Chapter Scholarship, Chancellor will be one step closer to fulfilling his dream of researching and developing new technology that will enhance human existence. The honor and pleasure of recommending Chancellor for this scholarship is all mine as I am confident it will serve as a steppingstone for the many places he will go in life. I look forward to hearing about his many experiences and thank you in advance for helping to make his dreams come true.

Respectfully,

Krista Sanders
Educator, Math Teacher
